The legitimacy and stability of Liberal Democratic states has long been taken for granted. However, the recent rise of populism has thrown this into question. The leaders of these populist parties and movements have questioned some of the central features of liberal democracy. They have, for example, challenged the authority of democratic institutions such as an independent judiciary. As a consequence of this challenge the legitimacy of many liberal democratic states is at its lowest since the 1930s. Those in favour of liberal democracy argue that we should not take it for granted.

Modern bourgeois society has not done away with class antagonisms. It has but established new classes, new conditions of oppression, new forms of struggle. Society is more and more splitting into two great hostile camps, into two great classes directly facing each other – the Bourgeoisie and the Proletariat. The Bourgeoisie has ... conquered for itself in the modern representative state, exclusive political sway. The executive of the modern state is but a committee for managing the common affairs of the whole bourgeoisie. The bourgeoisie has forged the weapons that bring death to itself; it has also called into existence the men who are to wield those weapons – the proletariat
